

Samarth Narahari Mandagere

(213) 843-6405 | samarthmandagere.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Los Angeles, CA

EDUCATION

University of Southern California

Master of Science in Computer Science

Los Angeles, CA

August 2025 – May 2027

Relevant Coursework: Analysis of Algorithms, Web Technologies, Database Systems

BNM Institute of Technology

Bachelor of Engineering in Computer Science

Bengaluru, India

November 2021 – June 2025

- **GPA:** 9.51/10 **Honors:** BNMIT Merit Scholarship, Best Project Award (ISL), 1st Place (Prodathon '21)
- **Leadership:** Core Organizer for Tatva fest; managed 5 committees and a 24-team esports tournament

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: React, NodeJS, Django, Flask, Pandas, NumPy, OpenCV

Tools & Platforms: AWS, Azure, Git, Linux, Docker, MongoDB, MySQL, Power BI

Methodologies & Practices: Agile, SDLC, CI/CD, Integration Testing

INTERNSHIP EXPERIENCE

Vylar (Lost Stories)

AI Research Intern

Bengaluru, India

Sep 2024 – Feb 2025

- Engineered an end-to-end content ingestion and processing pipeline in Python, reducing multilingual transcription time by 85% by implementing parallelized audio chunking and a vocal isolation API for noise reduction
- Developed a full-stack content moderation dashboard from scratch, enabling an internal team to verify creator-submitted stories based on an automated safety score (hate speech, historical accuracy) and manage content status
- Designed, built, and deployed two key product features: a creator analytics dashboard and a geolocational story recommendation engine, directly contributing to a 40% improvement in content discoverability

Vidatt Data Analytics Pvt Ltd

Front End Developer Intern

Bengaluru, India

Sep 2023 – Dec 2023

- Boosted UI render efficiency by 2x by re-architecting 15+ core React components and implementing performance-optimized interactive gradients, directly contributing to a 30% increase in user retention
- Ensured code reliability by writing a suite of unit tests for React hooks using Jest, maintaining 100% test coverage for critical business logic throughout all development phases

Samsung PRISM

Intern - Border Matching Worklet

Bengaluru, India

June 2023 – Dec 2023

- Reduced manual image comparison workload by over 75% by engineering an automated Python script to process and validate large batches of UI and camera images using OpenCV

ACADEMIC PROJECTS

Indian Sign Language Interpreter (Best Project Award), Team Lead

Jan 2025 – Apr 2025

- Delivered 100% real-time gesture-to-text translation by engineering a full-stack web platform using Flask, a NoSQL database, and a React frontend
- Developed a robust video processing pipeline using OpenCV and MediaPipe to capture and normalize user gestures from a live webcam feed for model inference

Automated Mail Generator, Backend Engineer

July 2024 – Aug 2024

- Increased email classification accuracy by 25% by developing a Django application that integrated a Naive Bayes classifier for intelligent, voice-based email access
